

# PowerPoint Alchemy

## Audience Voting

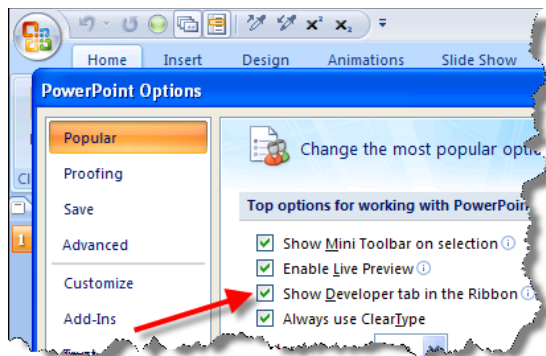

This simple template allows you to input audience votes and see the result instantly in a graph.

In the demo you are restricted to two “channels” and the PowerPoint Demo watermark will show on your slide.

## Visual Basic Code

This product uses vba code. You must have macro security set low enough to allow it to run. In versions before 2007 the maximum setting is “Medium” and in 2007 “Disable with notification”. With these settings you must also be careful to enable content if asked.

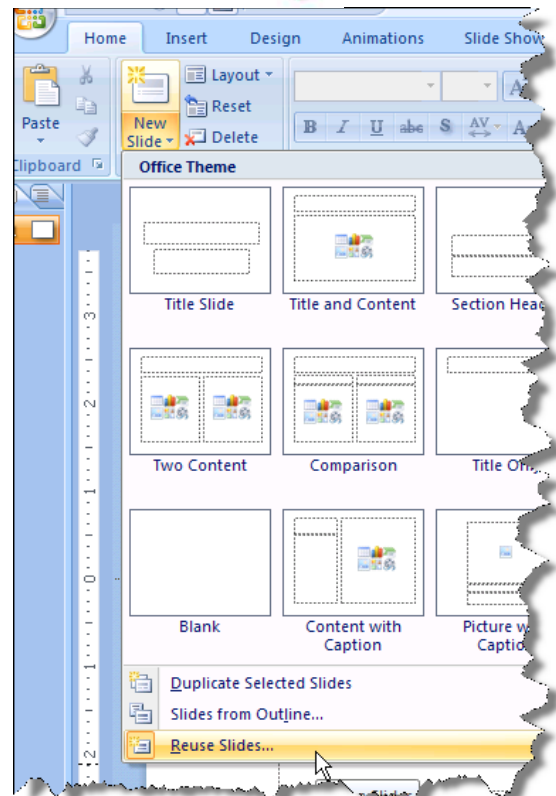

In version 2007 enable the Developer tab to change settings. To do this Office Button (the big one) > PowerPoint Options > Popular

In earlier versions use Tools > Macros > Security.

## Add to your Presentation

You can either copy paste the slide or use “Insert slides from files (before 2007) or Home Tab > New slide > Reuse slides in 2007.

## Changing the Slide

You may change the background fill and bar format. You may also change the text in the labels (A & B) and add further items to the slide.

## Warning

You will get an error if you rename or remove the graph frame, bars or input boxes. You may resize the graph frame a little but note that text elements may not resize. If you resize or move the frame you will need to manually move the bars, labels and input boxes.

## Full Version

If you like the demo the full version has 2, 3 and 4 channel voting and no watermarking.

The full version is only \$29.99 US!
